👤 ABOUT ME

Aspiring software engineer and machine learning enthusiast with a focus on building real-world products. Co-founder of LegalAid, an AI-powered LegalTech platform for automated contract generation. Co-founder & full-stack developer at NomadGym, a pay-per-hour gym booking platform. Experienced in full-stack development using the MERN stack and scalable system design. Built machine learning models for predictive analytics, including Formula 1 race outcome prediction. Strong in data handling, feature engineering, and backend development using Python. Passionate about building impactful products by combining AI, data, and software engineering.

🎓 EDUCATION

Bachelors of Science in Information & Technology (B.Sc I.T)

St. ROCKS COLLEGE

07/2023 – 04/2026

Mumbai, India

In Progress-Currently in 3rd year of a 3-year program, focusing on software development, databases, web technologies, and project management.

🧠 SKILLS

MERN Stack — Full-stack app development using MongoDB, Express.js, React, Node.js | **React** — Build dynamic, responsive user interfaces | **JavaScript** — Write interactive and efficient web logic | **Node.js** — Develop scalable server-side applications | **Express.js** — Create and manage RESTful APIs | **MongoDB** — Handle NoSQL database operations | **HTML** — Structure semantic and accessible web pages | **CSS** — Style responsive, cross-browser layouts | **Git** — Version control and team collaboration | **SDLC** — Apply agile and structured development practices | **Python** — Data handling, scripting, and basic OOP using NumPy & Pandas. | **Machine Learning** — Build models using Scikit-learn for regression, classification, and NLP.

📁 PROJECTS

[LegalAid](#) 🔗

11/2025 – Present

Co-Founder | AI-Powered Legal Document Generation Platform (LegalTech)

- Co-founded and built an AI-powered platform to generate legally structured Indian documents (NDAs, MoUs, agreements)
- Designed a clause-based document generation system aligned with Indian legal standards
- Implemented dynamic form-driven workflows to customize contracts based on user inputs
- Integrated LLM-based generation using structured prompts for context-aware legal drafting
- Developed full-stack MERN application (MongoDB, Express, React, Node.js)
- Architecting lawyer onboarding and verification system (BCI-based concept)
- Focused on scalability, document accuracy, and real-world usability of legal workflows

[NomadGym](#) 🔗

06/2025 – Present

Co-Founder & Full-Stack Developer India's first pay-per-hour gym booking platform

- Built and launched a PWA that enables users to instantly book gyms across India without long-term memberships.
- Designed user flows for gym-goers, gym owners, and admins, ensuring role-based dashboards and smooth booking management.
- Integrated Razorpay payments, real-time availability system, and dynamic gym search with Leaflet Maps API & geolocation.

- Onboarded initial gyms and created with React + Vite frontend and Node.js/Express + MongoDB backend.

Formula 1 Winner Prediction (ML Baseline)

04/2026 – Present

Machine Learning | Predictive Modeling | FastF1 Data

- Developed an ML model to predict F1 race winners using historical data and feature engineering
- Generated probabilistic predictions based on driver and team performance metrics
- Built a modular pipeline with automated training, evaluation, and artifact storage
